# DOING OUR PART

## TO ENSURE THE SAFETY OF OUR CUSTOMERS, STAFF AND PATIENTS.

---

As the nation navigates the unprecedented challenge to our country, West Physics continues to support the healthcare providers, partners, and communities across the nation. We are inspired by the acts of courage and compassion of the front-line healthcare workers and by the commitment of our employees in supporting them.

West Physics is committed to finding ways to meet our customers' needs while providing services in the safest possible manner. Our medical and health divisions have not been interrupted, and service and support teams remain available to ensure that you continue to provide the highest quality patient care and a safe working environment.

### **Methods West Physics has implemented to minimize the risk during the COVID-19 crisis:**

- All West Physics physicists have been issued their own PPE kits to utilize on-site while performing equipment testing, auditing, and consulting services.
- We offer evening and weekend options for on-site equipment testing at healthcare facilities to minimize contact with healthcare staff and patients.
- We are offering remote 'no contact' nuclear medicine audits by our team of qualified health physicists.
- Our staff has been trained to implement physical distancing practices with other healthcare personnel and patients when on-premises.
- Our staff is trained to follow the latest CDC guidelines and best practices with respect to infection control.
